Introduction

For those of you who follow the Eurovision Song contest, you'll be familiar with the famous 1981 winning entry called, "What's Another Year?", sung by two-time Irish winner, Johnny Logan. Well, folks, this is another year and let me tell you, it's going to be quite interesting, especially the second half but more on that later.

Twenty eighteen was such a heavy year energy-wise. From February to mid-March, there was such an oppressive energy that it made it quite difficult for people like myself who are psychic empaths. It drains us because we sense and feel the emotions of all those around us. If you recall, there was another mass school shooting in February which caused such strong feelings and public outcry for change to emerge, not just from the US but around the globe too. This had a knock-on effect on empaths who picked up on this tough wave of emotion washing over us, leaving some rather fatigued. Fortunately, from March 20th, with the exception of some weeks in May and June when the energy was quite oppressive again, 2018 was a transformative year for many, myself included. I have read in online forums and Facebook groups reports of many people feeling different both mentally and physically in a positive way by December 2018 than they were in January.

Now we come to 2019. Some of you may be wondering how do I predict what's going to happen. Well, being an angel card and photo reader at Lucid Psychic Services (<http://www.lucid-psychic-services.com>), I use a selection of Doreen Virtue Oracle decks to help tell me what's in store for each month. Don't worry, it's not all doom and gloom as you will see.

So I just want to take this opportunity to thank you all for purchasing this ebook. May 2019 be a fabulous year for everyone!

January 2019

January is usually a tough month for most people because Christmas is over and many pockets are feeling the effects of buying all those presents. There are many new year's resolutions made. Business plans are often laid out or written down at this time with further implementation being carried out as the year progresses. So for those of you wishing to start out on a new venture, read on.

Last year was very difficult and emotionally testing for people across the globe. So many on the spiritual path were feeling lost at the start of 2018. There just seemed to be no way out for them. This, however, won't happen or will be occurring a lot less in 2019. January is no exception. Much of the groundwork will have been laid and now it's time to build on that.

The first of the two cards I drew for this month says that yes, the idea you have been pondering on or business venture you've been thinking of pursuing is worth going after. However, do some research first and see if it's fully viable i.e. if you can afford to financially move forward with this, if there are any legal documents you need to get or any situations that may arise that would stop you from advancing forward with your plans. It's also a good time for writers to begin that long-awaited novel. So what are you waiting for? Start hitting those keys or jotting it down. Every year I, along with many psychics are asked by people, "How will I know if this is the right route or path for me to take?"

The second card I drew says that you just need to watch out for the signs. These can come in many forms such as: seeing numbers like "333", "11:11" or "444" repeatedly; finding feathers or coins often in the most uncommon places; certain words in a magazine ad or article just jump out at you which speaks directly to the venture or idea you are thinking of embarking on. A song may also play on the radio at a time when you most need an answer and it will give it to you without a doubt.

Around the World

There will be a lot of heavy rainfall in this month, more so than in previous years. In some places, it will cause a lot of damage, especially in the southern states in America. Countries near Haiti will also experience some damage due to the heavy rainfall.

Little ripples of change will start to take effect in a number of African countries but right now, they will be miniscule or unnoticeable. As the year progresses, however, it will become more apparent, causing the world to take notice along with interventions from powerful Western countries.
